The National Clearinghouse for Educational Facilities is funded by the U.S. Department of Education and provides information on planning, designing, funding, building, improving, and maintaining schools. NCEF is affiliated with the Educational Resources Information Center (ERIC) system and is managed by the National Institute of Building Sciences, a nonprofit organization authorized by Congress to serve as an authoritative source of information on issues of building science and technology. www.edfacilities.org

KnowledgeWorks Foundation is Ohio's largest public education philanthropy. It provides funding and leadership for education initiatives throughout the state as a means of removing barriers to quality education. KnowledgeWorks focuses on three program areas—communities and school facilities, school improvement, and college and career access—and is committed to helping inform public policy of educational issues in Ohio and the nation. http://www.kwfdn.org

The Council of Educational Facility Planners, International, was founded in 1921 as The National Council on Schoolhouse Construction and is the primary advocate and resource for planning effective educational facilities. Fostering and disseminating best practices in creative school planning, CEFPI's sole mission is improving the places where children learn. The Council represents more than 3,000 members in the United States, Canada, Australia, and other nations worldwide. http://www.cefpi.org

Building Educational Success Together is a research, constituency-building, and communications initiative seeking to make better urban school facilities a public priority at the national, state, and local levels. BEST works to secure policy changes that maximize the benefits of school facility improvements for students, teachers, and neighborhoods. BEST is led by the 21st Century School Fund of Washington, D.C., and is supported by the Ford Foundation as part of the foundation's commitment to public education excellence and equity. http://www.21csf.org/csf_home/BEST/best.asp

The Coalition for Community Schools is an alliance of more than 160 national, state, and local organizations representing community building, education, family support, government, health and mental health, philanthropy, policy advocacy, school facilities planning, youth development, and national, state, and local community school networks. The mission of the coalition is to create a united movement for community schools. http://www.communityschools.org

Acknowledgments

The publication sponsors extend their appreciation to Steven Bingler for his extensive help in revising and updating this second edition of Schools as Centers of Community. The sponsors also thank the following contributors and reviewers: Jim Biehle, Marty Blank, William Brenner, Ellen Czeplewski, Barbara Diamond, Fritz Edelstein, Laura Emmett, Randy Fielding, Mary Filardo, Susan Frost, James Gardner, Michael Hamilton, Bobbie Hill, Claudia Kent, Tom Kube, Judy Marks, Joanne Neft, Jane Quinn, Linda Roberts, Sam Sentelle, Michael Stanton, Geri Unger, Rilla Wiley, John Wingfelder, Rosemary Woodruff, and Roger Yohe.
Table of Contents

Part One. The Challenge ................................................................. 1

Part Two. Six Design Principles .................................................. 5
Design Principle 1. ..................................................................... 6
The learning environment should enhance teaching and learning and accommodate the needs of all learners.
Design Principle 2. ..................................................................... 8
The learning environment should serve as a center of the community.
Design Principle 3. ..................................................................... 9
The learning environment should result from a planning and design process that involves all community interests.
Design Principle 4. .................................................................... 10
The learning environment should provide for health, safety, and security.
Design Principle 5. .................................................................... 12
The learning environment should make effective use of available resources.
Design Principle 6. .................................................................... 13
The learning environment should be flexible and adaptable.

Part Three. Design Principles in Action ....................................... 15
Case Study 1. Gaylord High School, Gaylord, Michigan .................. 16
Case Study 2. PS 5, The Ellen Lurie School, New York, New York .... 18
Case Study 3. Center for Applied Technology and Career Exploration, Rocky Mount, Virginia ............ 20
Case Study 4. City Heights K–16 Educational Collaborative, San Diego, California .......... 22
Case Study 5. Tenderloin Community School, San Francisco, California .................. 24
Case Study 7. Noble High School, North Berwick, Maine ................ 28
Case Study 8. Crow Island School, Winnetka, Illinois ...................... 30
Case Study 9. Interdistrict Downtown School, Minneapolis, Minnesota ............... 32
Case Study 10. High Tech High, San Diego, California ...................... 34
Case Study 11. Henry Ford Academy, Dearborn, Michigan ................ 36
Case Study 12. Met Center, Providence, Rhode Island ....................... 38
Case Study 13. School of Environmental Studies, Minneapolis, Minnesota ................. 40
Part Four. Making it Happen ................................................................. 43

Getting Started and Getting Organized .............................................. 44
Step 1. Initiating the Planning Process ................................................. 44
Step 2. Funding the Planning Process .................................................... 45
Step 3. Identifying a Facilitator ............................................................. 46
Step 4. Assembling the Core Planning Team .......................................... 48
Step 5. Organizing the Steering Committee .......................................... 48

Involving the Community ................................................................. 50
Step 6. Involving Students ................................................................. 50
Step 7. Involving Parents ................................................................. 52
Step 8. Involving Educators ............................................................... 52
Step 9. Involving Business ................................................................. 53
Step 10. Involving Senior Citizens ...................................................... 55
Step 11. Involving Community Organizations and Government Agencies .... 55
Step 12. Involving the School Board and District Administration ............ 56

Developing and Implementing a Master Plan ....................................... 57
Step 13. Building Common Understanding, Shared Beliefs, and a Collective Vision .... 58
Step 14. Determining Educational Needs ............................................ 60
Step 15. Identifying Resources .......................................................... 61
Step 16. Developing Recommendations .............................................. 62
Step 17. Communicating with the Larger Community ............................ 62
Step 18. Creating a Master Plan ......................................................... 64
Step 19. Implementing the Master Plan .................................................. 65

Part Five. Some Final Thoughts ......................................................... 67
